Why Chrysalis High?

PUPA

At Chrysalis High, we believe that we can bring out the best in our children, help them excel & guide them on the right path only if we understand them inside out. PUPA (Prior Understanding of Pupil Attributes) is a collaborative effort between the teachers & the parents to achieve this. Starting with understanding the child through the eyes of a parent, observing & recording anecdotes & creating ample opportunities through initiatives like Enrichment Activities, Career Guidance etc.; we understand our children like no other. It is not without a reason hundreds of parents tell us every year, "You understand our child better than us."

CRISP

Chrysalis Rhapsody of Initiatives and Students' Passion is a milestone program which brings forth the invigorating and challenging facet of the students of Chrysalis High. The key elements are Competitions, Clubs, Life-skill sessions and Enrichment activities which keep the enthusiasm, ecstasy and a plethora of energy alive for our young learners.

ASPIRE

"No child left behind." This is the thought behind Chrysalis's ASPIRE Program. Children have their own pace of learning & interest in each subject. However, as a school which believes that academic strength of a child also results in improving the self-confidence of the child, our ASPIRE ensures every child gets the individual academic support he/she needs to ensure that the child is always at the level of his/her Grade.

CH-AI lab

Children learn through AI (Artificial Intelligence) and STEaM (Science, Technology, Engineering, Art, and Mathematics) education, equipping them to become Innovators, Developers, Entrepreneurs, and Leaders. The importance of AI and STEaM lies in fostering hands-on learning, critical thinking, problem-solving, teamwork, and self-confidence, while also offering real-time applications and innovative solutions through education and training.

TRANSITION BLOCKS

Transition Blocks to ease out the struggles of expanded curriculum when a child moves from Kindergarten to Grade I & from Grade IV to Grade V.

CHRYsalis' COFFEE & COOKIES CONNECT

We believe holistic learning has three pillars: the teachers, the child, & the parents. At Chrysalis High, we take regular feedback from the parents on the ever evolving child & align curriculum delivery to cater to the same.

Parent Speak

"The teaching methods are engaging and effective, helping our children grasp concepts with ease. The wide range of extracurricular activities has helped them grow creatively and build confidence. It's heartwarming to see how the school celebrates each child's uniqueness."

Manish kumar & Sapna Ranganath
Parents of Samar & Samaira

"Wonderfully managed Classes with no undue pressure on the children."

Sajan MP, Father of Arnav Sajan

"PUPA ensures there is constant communication between the teacher, the parent and the child. Both our children love their school & we can see them blossoming there."

Dr. Annapurna & Sachin Kamath
Parents of Anish & Aryan

"Not once but twice we had plans to relocate due to the professional needs but ultimately cancelled it as we didn't want to change Tulikka's school."

Swati and Sandeep Garg
Parents of Tulikka

We are very happy with the wonderful environment the school has created for the children. The teachers are warm, caring, and patient, and they make learning fun and engaging. Our child enjoys coming to school and often shares happy stories about the activities and friends. We truly appreciate the love, attention, and effort the staff put into helping the children learn, grow, and feel confident. Thank you for creating such a positive and nurturing place for young learners.
